INSTALLATION

- Whether it's cable, office layouts/workstations, servers, desktops, switches, routers, VPNs, etc., we can install, configure and support just about anything made for a small-to-medium sized office. We use only the best parts and accessories to ensure a lifetime of performance.

ADMINISTRATION

- Allerton provides a cost effective means of implementing and maintaining the ongoing administrative aspects of your network. This program is advantageous to those businesses that cannot justify the need for a full-time administrator. Have an assigned administrator address these needs at a significantly reduced hourly rate. We work for a limited number of clients so you have the benefit of an administrator that can be more attentive to your needs. We will also be familiar with your business environment and network.

LOCAL SERVICE, LOW RATES

PERSONALIZED SERVICE

Small business network installation, troubleshooting, and support

Data backup and security
